Lens Set

# CANON FL

---

"Canon introduced the FL lens series in 1964, bridging the gap between their earlier rangefinder lenses and the subsequent FD series. The FL lenses feature the gentle amber coatings akin to those found in the rangefinder series and incorporate the retrofocus optical designs characteristic of the later FD lenses. This series marries the best of both worlds, offering a mid-century optical charm with the convenience of modern compatibility.

The FL lenses are particularly noted for their versatility and performance, embodying Canon's commitment to quality and innovation during that era. This combination of historical quality and adaptability makes the FL series particularly valuable to both vintage photography enthusiasts and modern cinematographers seeking lenses with character and distinct optical qualities."

Lens	Focal Length	Enhanced CF	Focus Rotation	Weight (KG)	Front Diameter	Length (mm)	Image Circle	Iris Blade Count	Tstop
CANON FL	19	8"	180°	0.75	95	64.5	FULL FRAME 35	14	T3.5
CANON FL	28	12"	180°	0.6	95	57.5	RED W 8K VV	14	T3.5
CANON FL	35	10"	330°	0.75	95	70.5	REF 45×25	14	T2.5
