Lens Set

# MINOLTA ROKKOR

---

Crafted in the heart of Japan during the golden age of lens design, these gems represent a unique blend of technical precision and artistic character.

More than just a collection of glass, the Rokkor line was one of the most complete sets on the market, boasting a diverse range of focal lengths and innovative designs. This rehoused set features 12 exceptional lenses, spanning from a wide 17mm to a versatile 200mm. Among these treasures, you'll find the renowned 21mm f/2.8, the legendary 58mm f/1.2, and the beloved 85mm f/1.7. The 100mm f/2, an earlier design, stands as a testament to Rokkor's enduring legacy, while the remarkable 135mm f/2 showcases Minolta's relentless pursuit of optical perfection.

"Rokkor," a name inspired by the majestic Mount Rokko, which overlooked the Minolta factory in Japan, became synonymous with quality and innovation. Unlike many manufacturers, Minolta possessed the unique ability to produce its own glass elements and coatings, allowing them to meticulously control every aspect of the lens-making process.

Minolta Rokkor lenses, reimaged for cinema, offer a unique opportunity to capture your vision with a touch of vintage magic. They are a testament to a bygone era of optical craftsmanship, ready to elevate your storytelling with their exceptional performance and timeless character.
